

Coding Science Days

Friday 9 – Sunday 11 November 2018
CERN – Globe of Science and Innovation
HEPIA – Geneva

Are you a student aged between 10 and 18 years old, interested in science? Are you a parent or science / technology teacher?

[CERN Micro Club](#), [HEPIA](#) and the [Informasciences](#) association are organizing a unique educational event around four scientific kits based on the Raspberry Pi mini-computer and microcontrollers.

Workshops last one day. They will be held at CERN on Friday 9 and Sunday 11 November, at HEPIA on Saturday 10 November.

Limited number of places – Mandatory registration on voisins.cern
Workshops in French

Scientific computing serving society

Friday 9 November 2018, 8.00 p.m.
CERN – Globe of Science and Innovation

For more than three decades, computer science has played a leading role in modern science.

How to move from a simple interest in computer science to a scientific career or active involvement in research? Thanks to the open technologies used during the [Coding Science days](#) and on which the scientists of the world base their work, we will see how scientific computing improves our daily life and allows digital progress for the benefit of our society.

Conference in French with simultaneous interpretation into English.
Free entrance – More information and registration on voisins.cern
